CATALOGUE II

Introduction

For more than 10 years, Lifemaxx® has been designing, manufacturing and supplying commercial grade fitness accessories throughout Europe. Within this period our clients have always been our source for information and inspiration to make existing designs better and create innovative new products.

The last few years we expanded our product range significantly due to the continuous changing fitness market and the trend towards functional training. Our newest brand Crossmaxx®; specialized in functional training products, now offers a complete solution for all functional training areas. This year we are proud to launch our new line of poly urethane dumbbells, barbells and weightplates. These products are designed with an eye on functionality; they do not roll away and the marking of the weight is on all sides. We even made the dumbbell rack for the smaller weights look like a piece of art!

From our Rotterdam warehouse we are able to supply our clients with high quality products at competitive prices. We hold a high stock level, and being in the heart of Europe gives us the advantage to offer our clients quick deliveries and great service.
With healthy regards on behalf of the Lifemaxx® team,

Denise Doolhof & Diederick Goede

Keep in touch through our Facebook and Instagram pages and read about our latest updates, innovations, events and client experiences.

We’ve got balls

We have got balls! To train with of course.. and because we have so many different types we would like to explain which ball is perfect for your workout.

Gymball – LMX1100
A gymball is used in all kinds of workouts. For example you can use it for push-ups, planking exercises and rehabilitation exercises. When you train with a gymball your core muscles have to work harder in order to balance the ball. Exercises with a gymball improve your balance, coordination, flexibility and core stability. The gymball is available in three sizes: 55 cm (for length 152-175 cm), 65 cm (for length 176-190 cm) and 75 cm (for length 191-210 cm).

Peanutball – LMX1101
Using a peanutball you can do most of the stabilization and fitness exercises that you would normally do with a gymball. But the peanutball makes the exercise easier because the ball can only move in two directions. As a result the stabilizing element is not as intense as with a ball which can roll in all directions.

Slam ball – LMX1240
While most balls are not suitable to slam on the floor, the slam ball is! The slam ball has a weight core surrounded by a thick layer of durable rubber. Because of the rubber casing, the slam ball is suitable for intensive use and explosive exercises. In our assortment you can find slam balls of 35, 50 and 70kg with a diameter of 35cm. They are also suitable to use as Atlas stones without having to be afraid of damaging your floor.

Wall ball – LMX1243 / LMX1245
A wall ball is an training ball that is ideal to bring your functional training to the next level. Because the balls are available in varied weights, anyone can work out with them. The wall ball is ideal for fitness exercises, HIIT, to build strength and is even used during rehabilitation. These balls are capable of more exercises than the infamous wall balls, such as sit-ups, medicine ball squat cleans, running with the ball on the shoulder and deadlifts. The wall ball is not suitable to slam or throw hard against the wall.

Medicine ball – LMX1250
The medicine ball is designed to strengthen the muscles and especially the core. Using a medicine ball strength and cardio exercises become more challenging. Think of the Russian twist, the hip bridge, rolling push-up and roll-up. The medicine ball is provided with a fine structure which gives you a better grip than, for example, a wall ball. The medicine ball is not suitable for bounce or slam exercises.

Double handle medicine ball – LMX1250
Are you looking for a heavier ball with an even better grip than a medicine ball? Then the double handle medicine ball is the one for you! The two handles provide an optimal grip so this ball is suitable for explosive movements and movements where you use one or two hands.

Pilates ball – LMX1260
The pilates ball is mainly used as a support for a specific body part: knee, leg, foot, elbow et cetera. Because of the convenient size (20 or 25 cm) the pilates ball can be easily used between the knees, elbows, arms, legs, hands or feet.

Reaction ball – LMX1274
The reaction ball bounces all over the place when you throw it on the floor, so catching the ball is a real challenge. You train your entire core and you encourage the muscles that control your equilibrium and balance. In addition, the reaction ball is an ideal tool for the further development of hand-eye coordination and responsiveness. By practicing with the reaction ball you can improve the signal that goes from the brain through the central nervous system to the arms and legs.

Go to page 25-28 (Functional training & Groupfitness) and page 82 (Crossmaxx) for more information about each ball

How to clean your bar:

To perform in the best way possible you must take good care of yourself. But your equipment needs care too. We want you to enjoy your equipment as long as possible and have done our absolute best during the production process to ensure durability. Now it is your turn to treat your equipment with love and respect.

To help you out we have compiled guidelines that tell you how to treat and how to clean your bars so that you both will live happily ever after.

Care

1. Only drop your bar on a weightlifting platform, an equivalent platform or a floor that is covered with a rubber mat. Never drop your bar on a hard surface such as concrete or asphalt.
2. Never drop an empty bar (without plates) on the floor.
3. Never leave your bar after use loaded with weights on a rack or similar device. This could eventually cause the bar to bend.
4. Store your bar horizontally. When you leave your bar in a vertical position after use this can cause the oil in the sleeves to pile-up on one side. Use the LMX1027 Crossmaxx® wall mounted bar rack to carefully store your bars.

Maintenance

1. Brush down your bar with a nylon brush after use to get rid of chalk on the bar. This is important because the chalk attracts moisture which can cause your bar to rust a little. If a soft nylon brush is not sufficient you can use a harder brush. We prefer you don't use a wire brush as this can cause damage to the bar's coating.
2. Work some WD-40 or 3-in-1 oil over the bar and leave it for a few minutes. Wipe off excess oil with a dry cloth.
3. If your bar doesn't spin as smoothly as it did before, spray a little WD-40 in the sleeve and spin the bar a couple of times.

Bumper plates

LMX85C Crossmaxx® Competition bumper plate (coloured)

CROSSMAXX® Rigs & Accessories

The Crossmaxx® Rigs are designed to fit any club or training facility. The “Build-Your-Own-Rig” enables you to select the desired components and design the rig that is best fit for you and your facility.

We offer two types of Crossmaxx® rigs; the regular model and the XL model. The difference between these types is the tube size of the upright stands. The regular model offers a strong 60x60mm tube with a 3mm wall thickness, the Crossmaxx®XL model offers a 75x75mm tube with a 3mm wall thickness. Both Crossmaxx® series are a strong and durable choice for all athletic facilities.

Crossmaxx® Rig XL Base models

Hereby a selection of Crossmaxx® XL Rigs, but anything is possible! Our “Build-Your-Own-Rig” principle provides the freedom to design a Crossmaxx® XL Rig that is suitable for you!

Ordering

Ordering Lifemaxx® products can be done in several ways:
T + 31 (0)10 415 9800
info@lifemaxx.com / sales@lifemaxx.com
www.lifemaxx.com

When ordering please provide us with the following information:

- Full invoice- and shipping address
- VAT number
- Product codes and description of the products you wish to order
- Method of payment

Prices:

- All prices exclude VAT
- All prices exclude optional delivery charges
- Prices may change, please visit our website for actual prices

Delivery:

- We can deliver the order to you by parcel, pallet or Lifemaxx® delivery service
- Delivery charges can be requested via info@lifemaxx.com

Lifemaxx® delivery service not available for orders outside The Benelux.

Warranty:

All Lifemaxx® products are manufactured with our utmost care and craftsmanship. If any defects may arise, the following warranty regulations apply. Lifemaxx® products have a standard 1 year warranty period, with some exceptions:

- 3 year warranty on all Lifemaxx® PU products.
 - 6 months warranty on all cable attachments, all inflated materials, vinyl coated materials, all balls and bags.
 - 3 months warranty on all elastic materials, all jump ropes and aerobic mats.
 - No warranty on neck support rolls and ankle straps.
- If problems arise within that period, Lifemaxx® will repair or replace your product. We may request photographic evidence or will ask you to return the product to us for inspection. Lifemaxx® will not accept responsibility for defects arising from the misuse of any goods, or problems that arise outside the control of Lifemaxx®.

Not covered by the warranty (and tips to increase the lifetime of your products):

- Any damage resulting from use with racks not sourced from Lifemaxx®. For example rubber dumbbells should be stored on Lifemaxx® dumbbell racks which feature saddles to increase the lifetime of the products.
- Damage resulting from slamming or inflating products that are not designed for this purposes. For example medicine balls are not made for slamming or inflating.
- Damage resulting from throwing or dropping products that are not designed for this purpose. For example dumbbells, discs (bumper plates excluded) and kettlebells.
- Our Crossmaxx® rigs and Functional racks must be bolted to the floor for safe use.

For our full terms and conditions, please visit our website www.lifemaxx.com

Need help?

Do you need help with the planning for your personal training zone, weight lifting area, group fitness area or the total planning of a fitness facility or box? Or do you have questions about our products? Our dedicated and experienced team is more than happy to assist you. Please contact us by e-mail or telephone. We also would be delighted to welcome you in our showroom. In our showroom you will have the possibility to try and test all our products.

Couldn't find the product you are looking for? Please visit our website www.lifemaxx.com or our Facebook pages "LifemaxxFitness" or "CrossmaxxFitness" for the latest product updates or contact us.

Have ideas?

Have you got any innovative product ideas or ideas to make the Lifemaxx assortment even better than it already is? Do not hesitate to contact us, we will be happy to listen to your ideas!
